February 26, 2007

To Whom It May Concern;

This letter will serve as the Village of Muir's strong recommendation for the skills and qualifications of Wealing Bros., Inc. We recently completed a wastewater system rehabilitation project at our sewer ponds and Wealing Bros. was the main contractor.

They completed the project successfully and satisfactorily and in a timely manner. During the course of the project, there were a few challenging experiences, however, they were not phased by this and worked through them.

Wealing Bros. employees were always courteous and friendly when our superintendent or I had to deal with them. Many times the employees were hauling on narrow dirt roads, and we received praise for the way their truck drivers were always courteous to other drivers in the area.

We would welcome the chance to work with Wealing Bros again if the situation arose that we needed too and would gladly recommend their work to others. If you have any questions or need further information, please don't hesitate to call the Village of Muir.

Sincerely;

Laura Stewart  
Muir Village Clerk
